

Arthur Asasira

IT support technician

Windows · Networking · Technical troubleshooting

Acton, Massachusetts

arthurasasira1@gmail.com

asasira.dev · GitHub · LinkedIn

PROFILE

Technical problem-solver with a software engineering background, connected-device troubleshooting experience, and current medical-device manufacturing experience. Studying Electrical & Computer Engineering while building knowledge of Windows and Linux support, networking, hardware, and issue documentation. Known for following procedures carefully, identifying problems, and communicating technical information clearly.

TECHNICAL SKILLS

Support

Windows, Linux, troubleshooting, device setup, permissions, logs, documentation

Networks

TCP/IP, DNS, DHCP, Wi-Fi, IP addressing, packet-capture fundamentals

Software

Python, Java, PHP, C, SQL, APIs, Git, testing, Docker

Connected systems

LoRaWAN, GSM, Wi-Fi, sensors, ESP32/Arduino-class devices

EDUCATION

A.S. Engineering Science — Electrical & Computer Engineering

Middlesex Community College
In progress · 2026–present
Bedford, Massachusetts

Software Engineering coursework

Makerere University
2023–2026
108 U.S.-equivalent semester credits ·
GPA 3.53 · WES evaluation

PROFESSIONAL EXPERIENCE

Medical Device Assembler

April 2026–present

Jabil (Eastridge contract) · Clinton, Massachusetts

- Follow documented work instructions and maintain procedural accuracy across 12-hour shifts.
- Identify component defects and escalate nonconforming material to support quality and traceability.
- Work with a team across manual and semi-automated production stations.

IoT Research and Development Intern

2025–2026

IoT Research and Application Lab (IoT-ra) · Kampala, Uganda

- Contributed hardware and software to adaptive communications using LoRaWAN, GSM, and Wi-Fi.
- Integrated sensing and communications for beehive monitoring and an automated mushroom environment.
- Diagnosed device-integration issues and documented work with researchers and developers.

SELECTED PROJECTS

Deployed web platforms

Yoshule · TundaMate · Qreze

- Built and deployed user-facing applications using web frameworks, APIs, databases, and cloud services.
- Translated user and business requirements into working interfaces and backend workflows, then diagnosed issues across application components.
- Live work: yoshule.com, tundamate.xyz, and app.qreze.com.

LEADERSHIP

Former IEEE student branch chair and Google Developer Groups on Campus co-lead; organized technical activities, collaborated with student teams, and communicated technical topics to community audiences.
